

Optimize Your Business Technology

Computer & Networking Services, LLC

Work Smarter

Business Computer & Network Specialists

Your computers, network and IT system are the backbone of your business. They provide the infrastructure that supports everything you do and are keys to your success. Without the efficient, uninterrupted, secure flow of information and data, productivity will be lost and your company will grind to a halt. That is why you need PNTR.

PNTR specializes in providing companies and organizations with the expert computer, networking and IT services and solutions they need to do business effectively. We offer a comprehensive range of capabilities, from complete network design, setup and maintenance, to computer repairs, updates, malware removal and much more.

At PNTR, we understand businesses and their vital need for highly functional, dependable IT technology that is secure, cost effective and designed to help achieve their goals. We deliver solutions that work and enable you to *Work Smarter*.

Computer & IT Professionals

PNTR has established itself as a highly dependable computer, networking and IT services provider that delivers the results customers need for business success. Pete Rush, President and Consultant, has over ten years of experience assisting companies in diverse industries, from automotive and manufacturing to retail, professional and other services. Drawing upon his expertise, innovation and commitment, Pete sets the standard for IT quality and service in Lancaster County and the surrounding area.

"I personally 100% guarantee our work."

The Reliable Solution

When it comes to your computers, network and IT system, failure is not an option. You simply cannot afford to have them underperform or, worse yet, be down. PNTR has a 100% success rate for implementing effective solutions and troubleshooting problems for the businesses we serve. We achieve these exceptional results through:

- Exceptional technical expertise in computer, network and IT systems
- Extensive system design, maintenance and troubleshooting experience
- Innovative approaches and solutions to business IT challenges
- The highest standards for customer service and responsiveness
- A deep commitment to delivering what we promise
- And more

To stand behind our service, we include a 100% guarantee on everything we do.

Flexible Service

Every business's needs are different, so PNTR offers flexible service arrangements, from total turnkey solutions to project-based installations, troubleshooting, repairs, maintenance and more. We can function as your outsourced IT department, seamlessly integrate with your in-house staff or be on call for periodic assistance and special needs.
